«НОЕВ КОВЧЕГ»

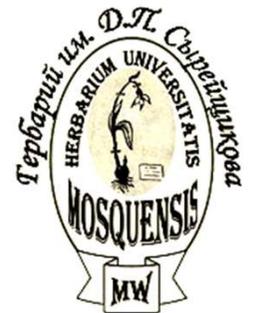

# Как устроен Цифровой гербарий МГУ - крупнейшая в России база данных по биоразнообразию

Н.С. Гамова

от лица коллектива Гербария МГУ

# Moscow University Herbarium (MW)

- Founded ca. 1780
- The second largest herbarium in Russia
- Six staff members (science & technical)
- Part of the *National Depository Bank of Live Systems* initiative (launched by the Moscow University)
- No international loans due to custom regulations

# Specimen Total

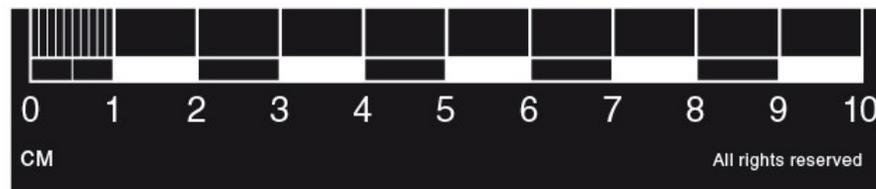

- **1,023,592** specimens (as of Aug 2017)  
including:

- 936,506 vascular plants
- 77,086 bryophytes
- ca. 10,000 lichens

Statistics update is available once a year.

Open cupboard showing overcrowded shelves

# Specimen Ranking

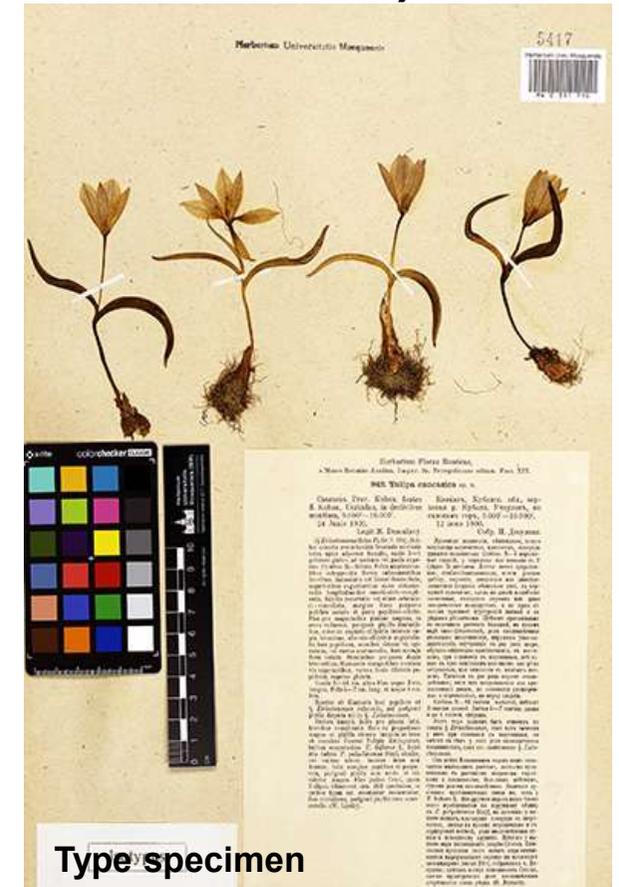

- 61<sup>th</sup> in the world
- 24<sup>th</sup> among university herbaria
- 2<sup>nd</sup> in Russia (after Komarov Institute)

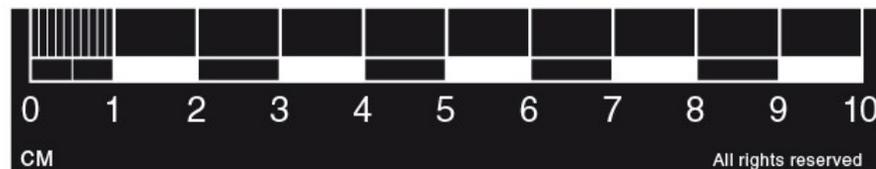

# Taxonomic Outline

- 39,323 species (excl. historic collections) including:
  - 37,100 vascular plants
  - 2,223 bryophytes

Types of ca. 3,000 taxa are curated separately (4,620 specimens).

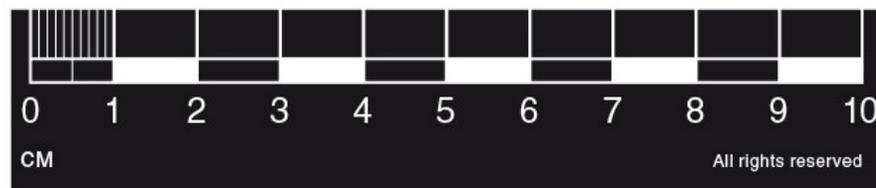

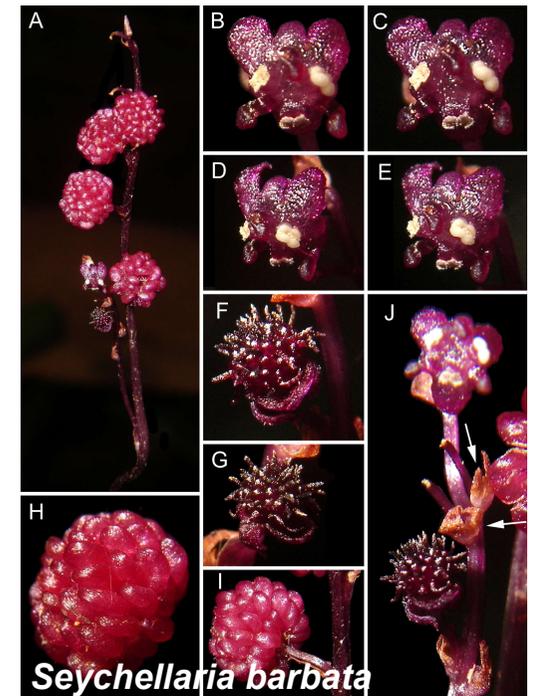

Type specimen

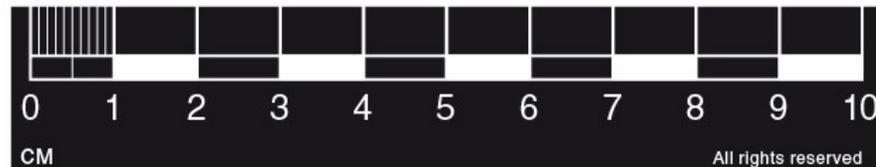

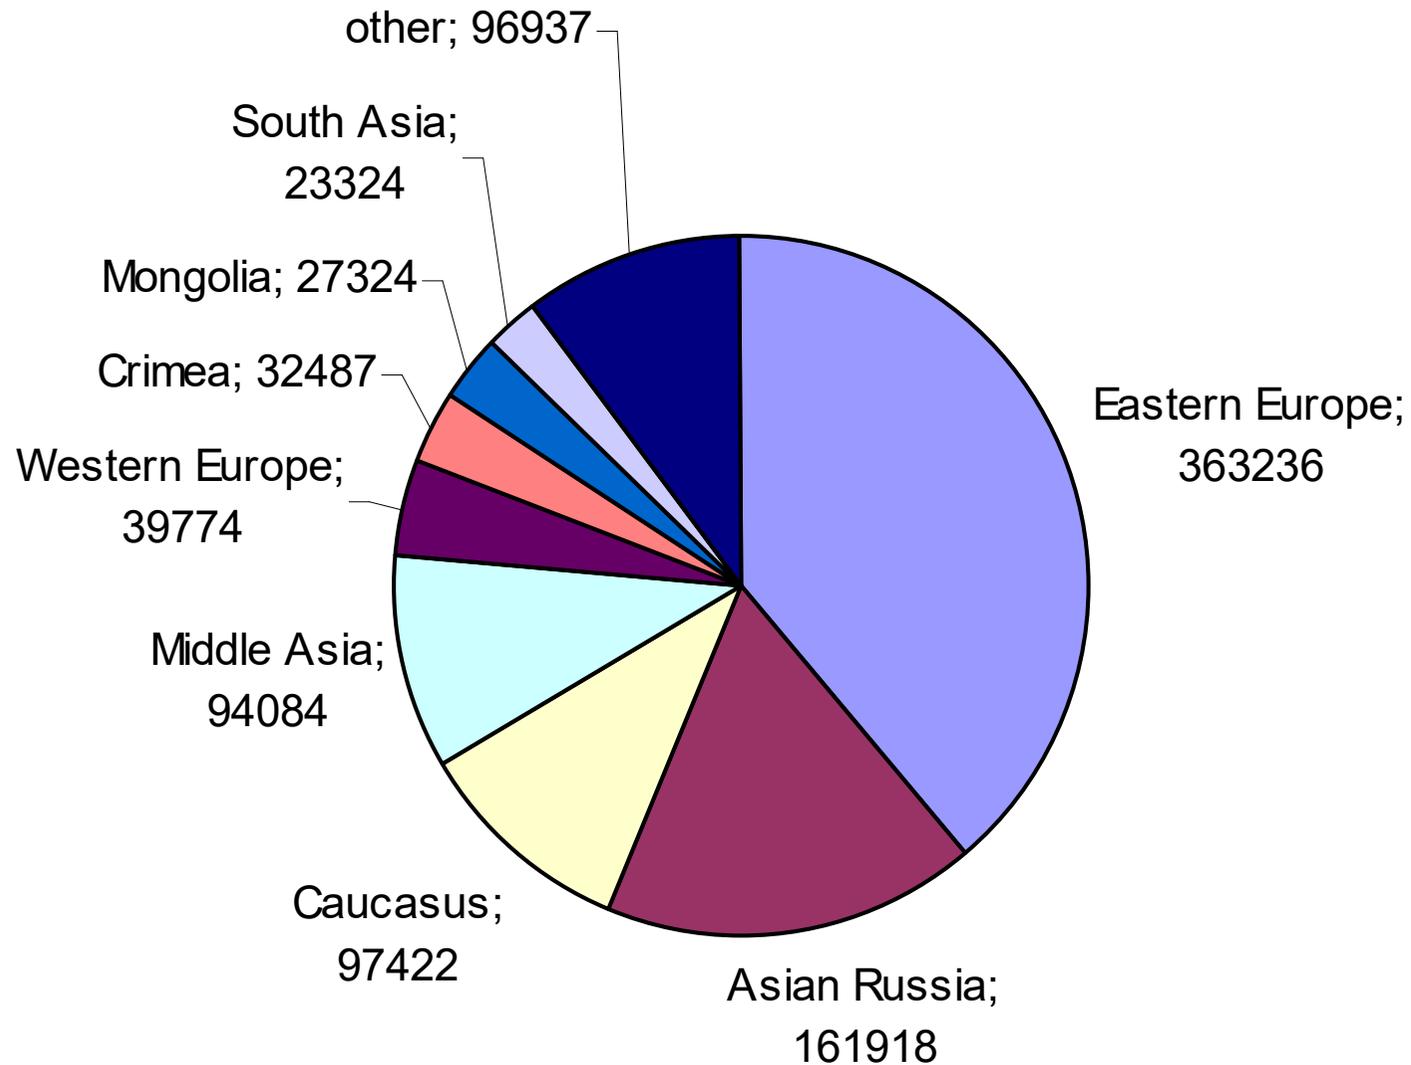

# Plant Taxonomy in the Moscow University

60 new species of vascular plants were described by the Moscow University staff members in 2012-2016:

- **Apiaceae:** 15 species (M. Pimenov, E. Kljuykov, D. Lyskov et al.)
- **Amaranthaceae s. l.:** 11 species (A. Sukhorukov)
- **Asparagaceae:** 10 species (N. Vislobokov et al.)
- **Amaryllidaceae s. l.:** 9 species (A. Seregin)
- **Apocynaceae:** 2 species (Y. Alexeev)
- **Cucurbitaceae:** 2 species (M. Nuraliev)
- **Polygonaceae:** 2 species (O. Yurtseva)
- **Thismiaceae:** 2 species (M. Nuraliev)
- **Molluginaceae:** 2 species (A. Sukhorukov)
- **Asteraceae, Centrolepidaceae, Lophiocarpaceae, Orchidaceae, Triuridaceae:** 1 species

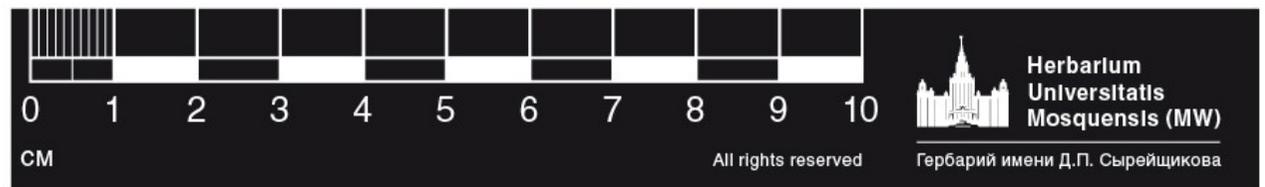

# Geographical Scope: Vascular Plants

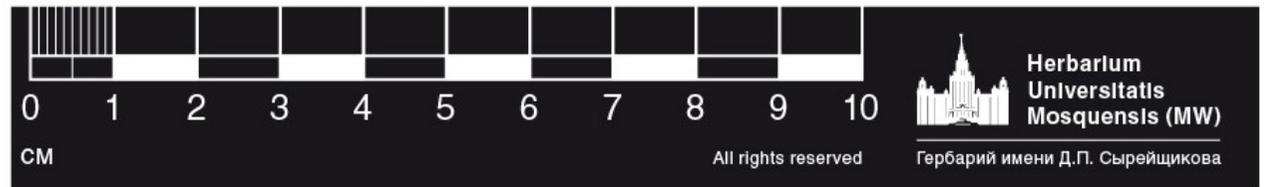

# Moscow University Project

- Moscow University have received 750,000,000 RUR (ca. 10,910,000 Euro) for foundation of the ***National Depository Bank of Live Systems*** from Russian Science Foundation.
- 4-year project (2015-2018).
- Five branches: 1) Plants; 2) Animals; 3) Fungi & Microbes; 4) Human Material; 5) Bioinformatics.

# Moscow University Project: Plants

- 125,000,000 RUR (ca. 1,820,000 Euro) for plant studies (collections, new labs, expeditions, extra salary, etc.) in 2015-2018.
- The largest grant in the history of Russian botany.
- 24% for the Moscow University Herbarium (MW) for digitisation, databasing and management.

Herbarium  
Universitatis  
Mosquensis (MW)

Гербарий имени Д.П. Сырейщикова

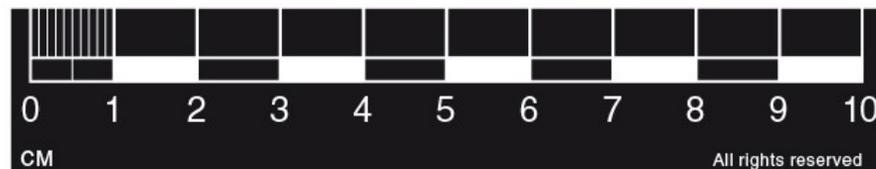

# Herbarium Budget in 2015-2016

## Contract with a commercial partner:

- **11,850,000 RUR**  
(ca. 172,360 Euro) for  
digitisation of 786K  
specimens (or  
15.08 RUR per  
specimen)

First days of digitisation using planetary scanners

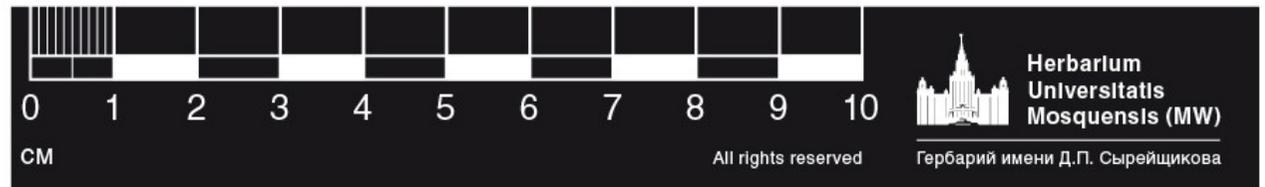

# Extra Funding in 2015-2016

## Development of the web portal:

- **2,500,000 RUR** (ca. 36,400 Euro)

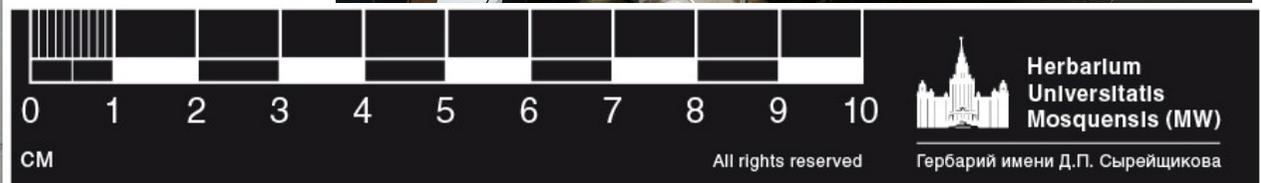

## Additional herbarium facilities (cupboards):

- **4,800,000 RUR** (ca. 69,800 Euro) for the additional space to preserve ca. 192K new specimens

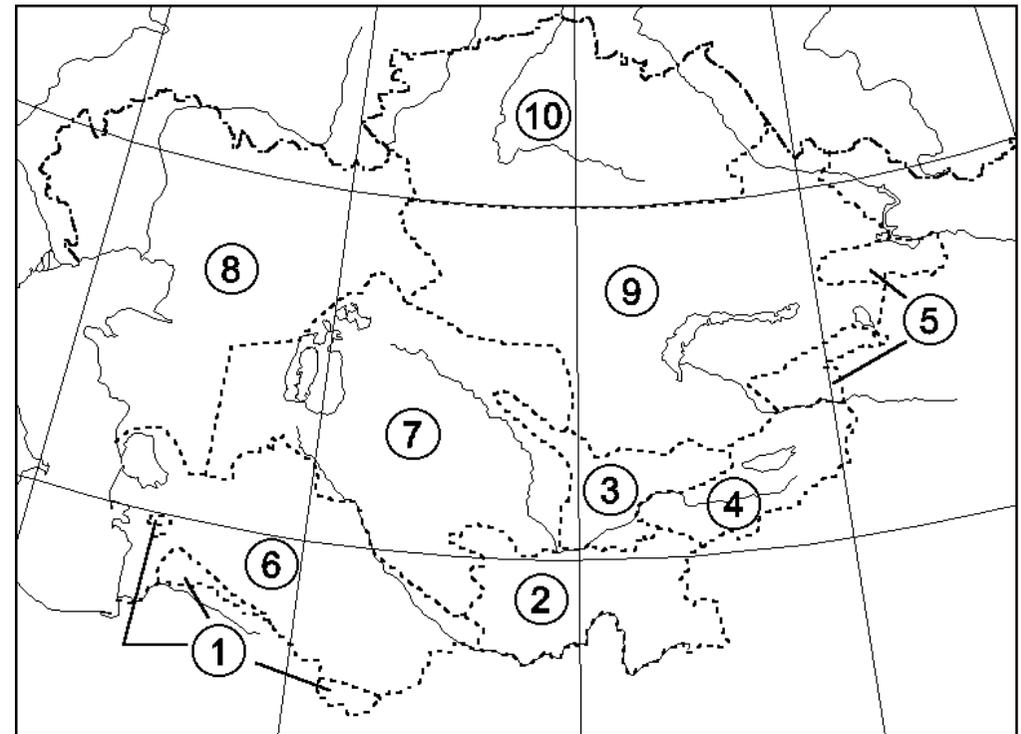

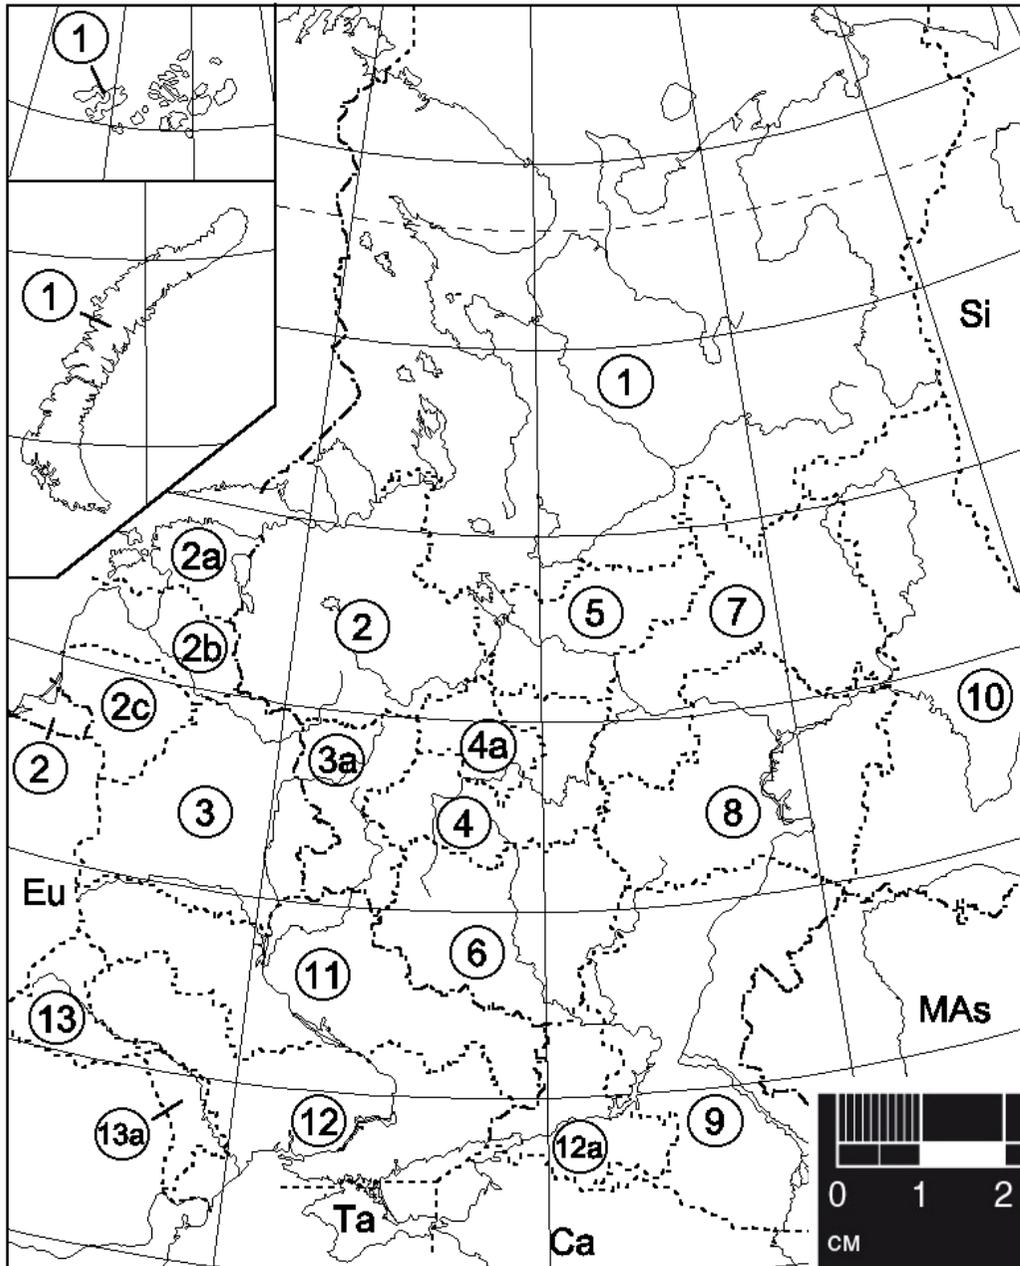

# Digitisation: Imaging as the First Step

- Only imaging at 300 dpi TIFF (JPG copy)
- Basic metadata from folders (ID, species name, area code)
- No label data
- Free full online access

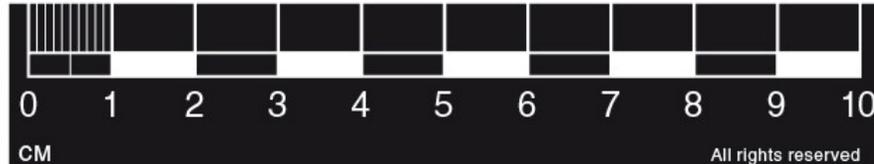

# Area Codes from Folders

↑ Area codes of Middle Asia

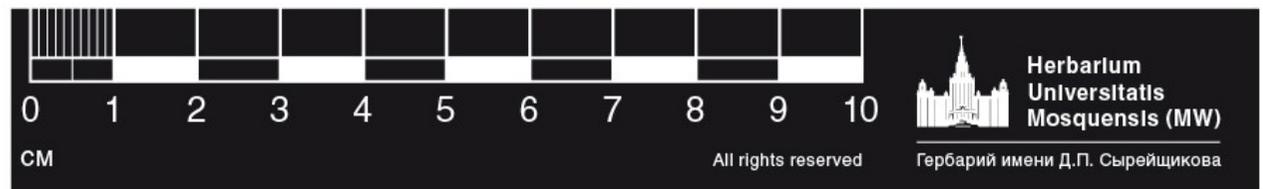

← Area codes of Eastern Europe

# Metadata Production

Table showing presence of 11 specimens of *Limonium dichroanthum* (Rupr.) Ikonn.-Gal. from M3 geographical area (Western Tian Shan).

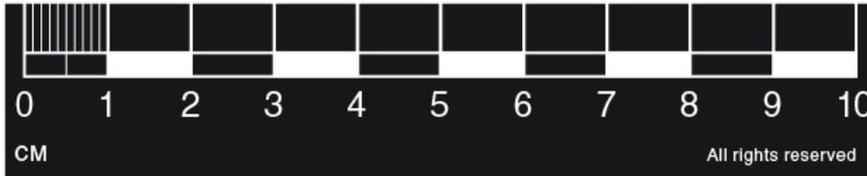

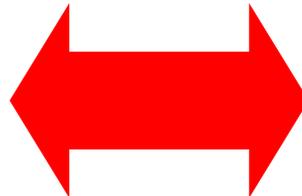

# Barcodes as an Accurate Counter

## Eastern European collections:

- 338,940 specimens before barcoding
- 352,720 specimens after barcoding
- 13,780 increase (+4.07%)

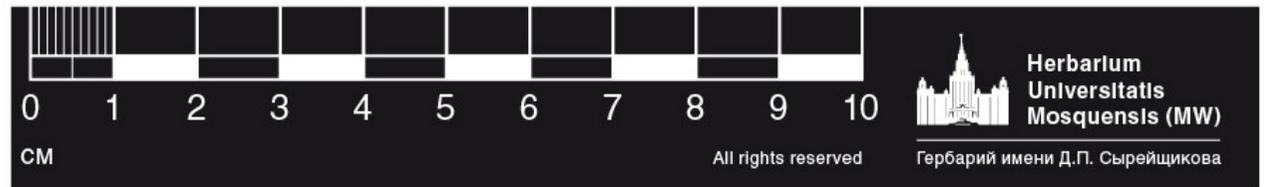

# Metadata Example

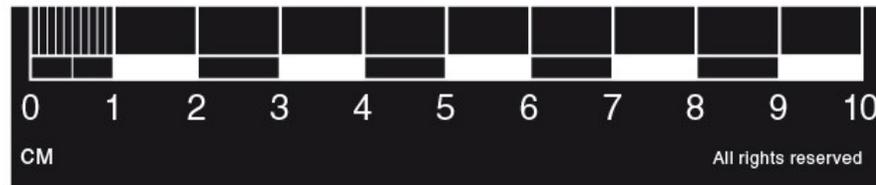

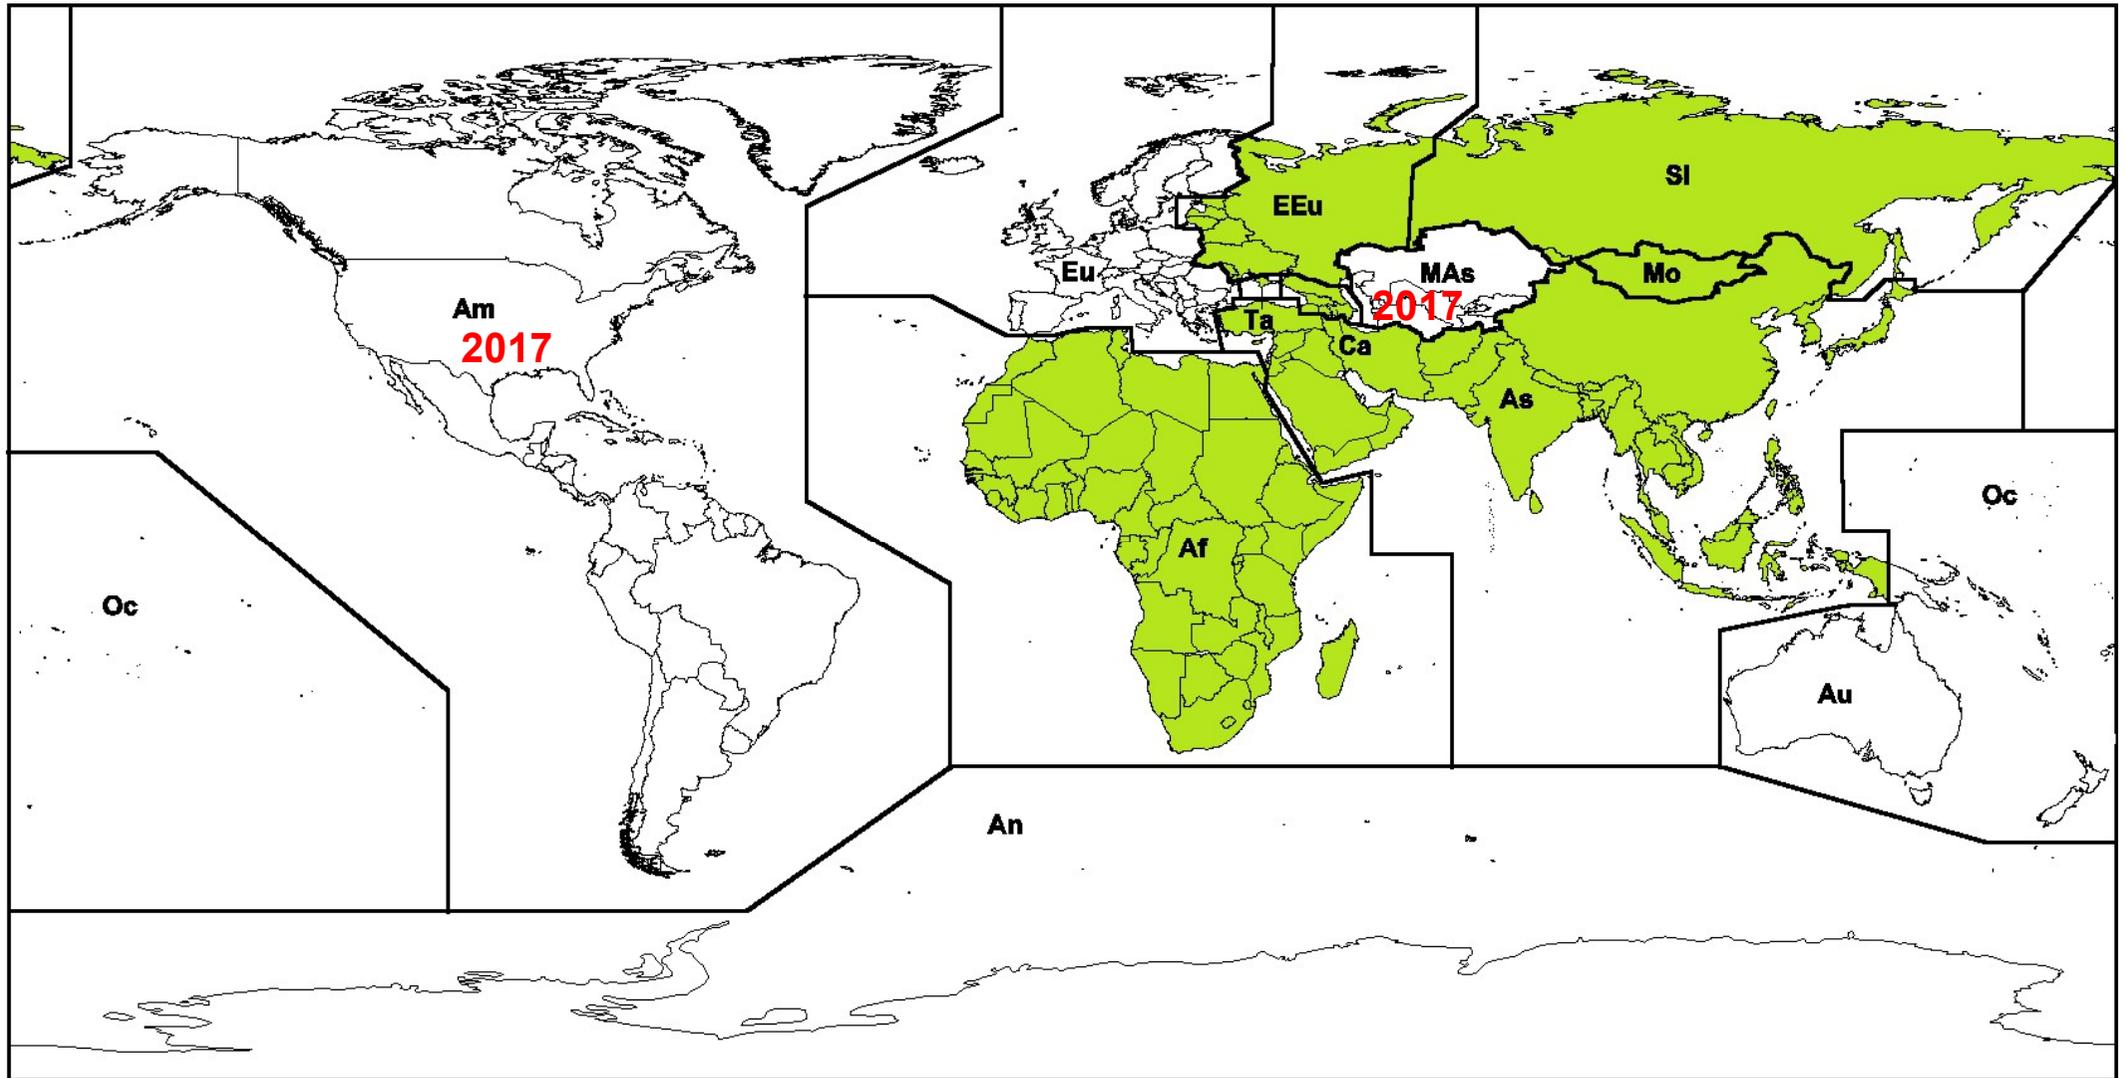

# Current Digitisation Rate

- **785,844** specimens (77.7%) are scanned and available online including:
  - 708,209 specimens of vascular plants (300 dpi)
  - 4,632 type specimens of vascular plants (600 dpi)
  - 72,997 labels of bryophytes

# Current Digitisation Coverage

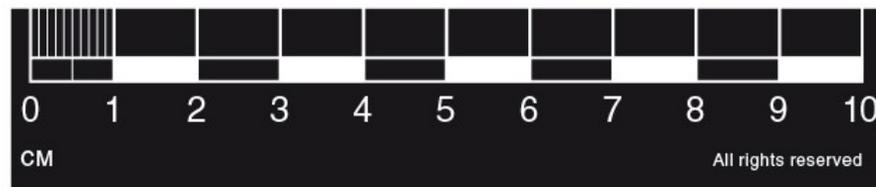

# Digitisation: Quick Geotagging

- Country names were used as geotags
- 756K specimens were geotagged using existing country names from folders
- 30K specimens were geotagged manually in 2017

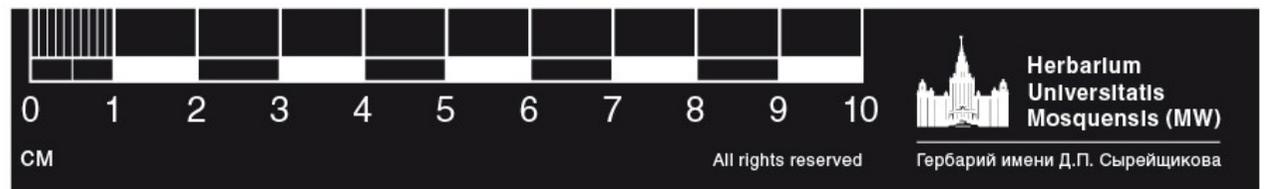

# Collection Growth Due to Digitisation

- Mean annual increase in 2005-2016 was 15,100 specimens
- In 2016, we added 22,013 specimens (expeditions, old collections, gifts, exchange, etc.)

# Online Access

- <http://plant.depo.msu.ru/> (public access)
- Russian and English versions
- 786K specimens at 300 dpi (JPG)
- Automatic linking of the collection names with *Catalogue of Life* taxonomy
- No label data at the moment
- No geographical coordinates

## Национальный банк-депозитарий живых систем

Проект Московского университета "Ноев ковчег" посвящен созданию многофункционального сетевого хранилища биологического материала.

Планируется работа с материалом всех возможных типов - от отдельных биологических молекул до целых живых организмов.

Создание депозитария позволит сохранить биоразнообразие нашей планеты и создать новые способы полезного использования биологического материала.
